

On page 4, delete the 3rd paragraph, and replace this paragraph with the following in accordance with 37 CFR § 1.121. A marked up version showing changes is attached:

Fig. 3. illustrates the DNA sequence of isoform 3 of the pin1 gene promoter (SEQ ID NO: 3) highlighting the translation start site, TATA box and CAATT box.

On page 4, delete the 4th paragraph, and replace this paragraph with the following in accordance with 37 CFR § 1.121. A marked up version showing changes is attached:

Fig. 4. illustrates the DNA sequence of isoform 1 from amt gene promoter (SEQ ID NO: 4) highlighting the translation start site, TATA box and CAATT box.

On page 4, delete the 5th paragraph, and replace this paragraph with the following in accordance with 37 CFR § 1.121. A marked up version showing changes is attached:

Fig. 5. illustrates the DNA sequence of isoform 1 from amt gene promoter (SEQ ID NO: 5) highlighting the translation start site, TATA box and CAATT box.

On page 4, delete the 8th paragraph, and replace this paragraph with the following in accordance with 37 CFR § 1.121. A marked up version showing changes is attached:

Fig. 8. illustrates the DNA sequence of the cDNA corresponding to the pin1 gene (SEQ ID NO: 6).

On page 4, delete the 9th paragraph, and replace this paragraph with the following in accordance with 37 CFR § 1.121. A marked up version showing changes is attached:

Fig. 9. illustrates the DNA sequence of the cDNA corresponding to the amt gene (SEQ ID NO: 7).
